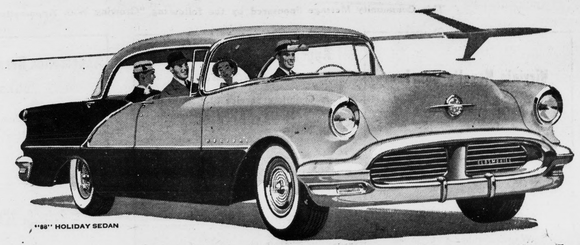
IT'S TORQUE THAT MAKES THE WHEELS GO 'ROUND!



"98" HOLIDAY SEDAN

. . . And the High-Torque Output of Oldsmobile's Famous Rocket Engine Is Instantly Translated into Outstanding Performance at the Rear Wheels!

LET'S TALK TORQUE! In plain language, torque is "twist." It's the force that makes the wheels go 'round.

So it follows . . . the more torque your engine has, the more go *power* your car has . . . the more getaway at the light . . . the more action on the open road!

That's why, when it comes to power, there's nothing like Oldsmobile's Rocket T-350 Engine — because the Rocket is *torque* TNT! Figures prove it: 350 pound-feet at 2800 rpm (340 pound-feet at 2400 rpm in "88" models).

OLDS CHASSIS IS ENGINEERED TO HANDLE HIGHER TORQUE!

Oldsmobile has the chassis to take Rocket torque . . . a skillfully engineered Oldsmobile chassis with an extra-sturdy, dynamically balanced drive shaft, and an extra-rigid frame that resists twisting and weaving.

What's more, the Rocket's got horsepower *— to spare!* And with Oldsmobile, it's high *usable* horsepower . . . a by-product of engine design aimed straight at the wheels — design that translates horsepower into terrific torque at *normal* engine rpm's.

TOP TORQUE MEANS TIP-TOP PERFORMANCE!

The result is higher torque — silken, responsive Rocket action. Touch the accelerator — ever so gently — you "go" . . . and we do mean "GO"! You thrill to smoother, swifter bursts of power for everyday use — spectacular performance, when you need it . . . when you want it.

Any way you look at it, you can't top the Rocket for thrills for the money — or for top return when it's time to trade. Stop by soon. Rocket 'round the block . . . or around the town if you like!

OLDSMOBILE'S RO"KET — a double winner in 1956 Mobilgas Economy Run. Get the feel of top horsepower, top torque in the engine that's an economy champion, too!

**240 hp. in Ninety-Eight and Super 88 models; 230 hp. in "88" models.*
